Our wonderful STEAM projects stand for Science, Technology, Engineering, Arts and Mathematics. When we collaborate these together in a hands-on project we can have some real fun. Children gain confidence by problem solving, building relationships and working through creative techniques, we want to help grow innovators at St Claire's! Activities are subject to weather conditions, where possible we have made alternative arrangements, but this may not always be possible. Please remember, the children chose whether to join in because the activities listed above are just one from a selection of games and activities going on at any one time, your child may choose to join others or create their own. We always try our best to say 'yes' and encourage children's own ideas. We will never make them do an activity in which they have no interest. Other activities can be arranged to support your child's needs of interest where possible.

Winton Under 8's Adventures	Monday	Tuesday	Wednesday	Thursday	Friday
w/c 23rd July General Fun Days!				ALL DAY FUN!	ALL DAY FUN!
